

Introduction: Social Data Analytics

INF1005/6, Prof. Alex Hanna

March 1, 2018

Class Description

- Data Science
- Python programming
- Social data

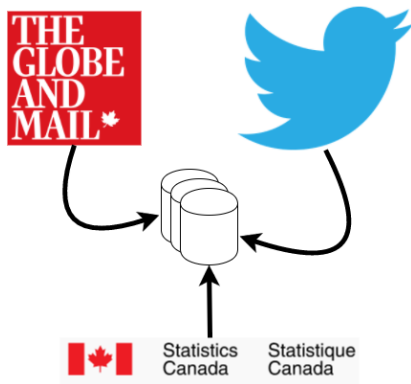

Class Goals

- Identify
- Collect
- Transform
- Analyze
- Visualise

Class Goals

- Identify
- Collect
- Transform
- Analyze
- Visualise

About Me

- Professor Alex Hanna
(Prof. Hanna, or Dr.
Hanna)
- PhD and MS in Sociology
- BS in Computer Science
- Transgender and queer
- Pronouns: she/her/hers

About Me

- Professor Alex Hanna
(Prof. Hanna, or Dr.
Hanna)
- PhD and MS in Sociology
- BS in Computer Science
- Transgender and queer
- Pronouns: she/her/hers

Big Data is “Trace” Data

Big Data Fields

“Data Science”
“Business intelligence and analytics”
“Computational social science”

Computational Social Science (Shah et al. 2015)

- the use of large, complex datasets, often... measured in terabytes or petabytes
- the frequent involvement of 'naturally occurring' social and digital media sources and other electronic databases
- the use of computational or algorithmic solutions to generate patterns and inferences from these data
- the applicability to social theory in a variety of domains from the study of mass opinion to public health, from examinations of political events to social movements

Computational Social Science (Shah et al. 2015)

Computational Social Science

- Network analysis
- Automated content (e.g. text and image) analysis
- Massive Online Experiments

Fig. 2. The political retweet network, laid out using a force-directed algorithm. Node colors reflect cluster assignments (see text).

Prediction and Platform Politics

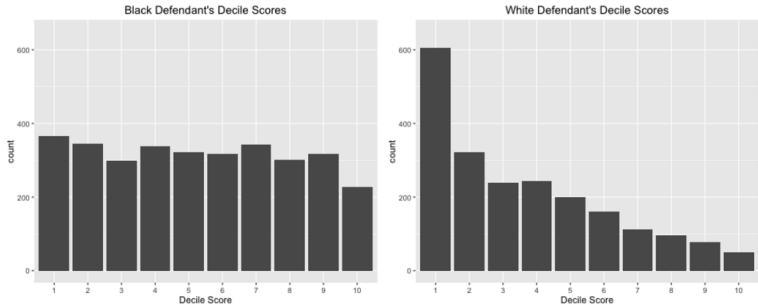

Data and Informed Consent

Data and Criminal Justice

We began by looking at the risk of recidivism score. Our initial analysis looked at the simple distribution of the COMPAS decile scores among whites and blacks. We plotted the distribution of these scores for 6,172 defendants who had not been arrested for a new offense or who had recidivated within two years.

These histograms show that scores for white defendants were skewed toward lower-risk categories, while black defendants were evenly distributed across scores. In our two-year sample, there were 3,175 black defendants and 2,103 white defendants, with 1,175 female defendants and 4,997 male defendants. There were 2,809 defendants who recidivated
